

Test Objective:

The objective is to automate the below testcase using selenium WebDriver and framework concepts.

Testcase: Tc03

Process: Edit a new push notification under Marketing

Steps to Execute:

Step1: Login to admin portal

Step2: Edit a new notification by filling only the mandatory fields.

Expected Results: Validate the presence of the modified notification

Important note: Currently admin portal is navigating to the screen 'Edit Coupon', when the user tries to edit the notification, which is unexpected. Hence the mentor advised to work for the below objective, as it verifies the similar functionality.

Process: Add new notification under Marketing

Steps to Execute:

Step1: Login to admin portal

Step2: Add a new notification by filling mandatory fields.

Expected Result: Validate the presence of the added notification.

Below is for information:

User is trying to edit notification

#	Notification Name	Message	Image	Date Added	Action
1	Offer	Click on this for offers available		2018-12-14 15:44:00	Action +
2	a	a		2018-12-14 14:32:05	Edit Delete
3	Test	fafafa		2018-08-01 12:56:48	Action +
4	Test	fsfsf		2018-08-01 12:46:01	Action +

But the page for edit coupons is displayed.
